A: Malwarebytes as the first choice. Unfortunately, it's old but still the best with many MB software. Malwarebytes Anti-Malware This is what you should do. Download and install it. Create a system restore point before launching MBAM. Launch MBAM, download the updates and select 'Scan Now'. Clean the results. Launch MBAM, download the updates and select 'Options' from the start menu. In the MBAM dialog select "Edit Settings" and uncheck 'Quarantine only' and 'Enable quarantine scanning' Select 'Create logfile' Uncheck 'Show update details' and 'Show progress bars' Click on 'OK' Close the MBAM dialog Quarantine your system. This will clean your system from the malware and make sure that nothing catches you in the future. Now go to the website provided by the software and follow the instructions to unlock your GFusion 1.7 1. Field of the Invention The present invention relates to apparatuses and methods for delivering a medical device (e.g., a stent) into a blood vessel in a patient. More particularly, the invention relates to an apparatus and method for delivering a stent into a patient's body using low profile systems for controlled deployment of the stent and precise placement of the stent at a desired location in a blood vessel. 2. Description of the Background Stents have become a commonplace in modern medicine. These devices are typically tubular in shape, open-ended, and are expandable to a desired size and shape, for implantation in a blood vessel of a patient's vasculature. Expandable stents have been used to treat obstructed or narrowed blood vessels as well as to maintain open channels or passageways in blood vessels. For example, percutaneous transluminal coronary angioplasty (PTCA) and stent placement are treatments for heart disease. These procedures generally involve the use of a balloon catheter. In PTCA, the balloon catheter is used to widen a region of a blood vessel that has become narrowed due to the buildup of plaque or other substances. For both PTCA and stent delivery, there is an advantage to placing the stent in the narrowed region of the blood vessel and not in an adjacent region of the blood vessel. In particular, when stent implantation occurs in a region of the blood vessel that
