## Java Audio Recorder Crack + Product Key Full Download [Win/Mac]

Java Audio Recorder is a small software application developed specifically for helping you record and play back audio streams with the aid of straightforward actions. The tool can be deployed on all Windows versions out there, provided that you have the Java working environment on the target computer. Drop it on pen drives You can keep Java Audio Recorder on USB flash drives or other portable devices and run it directly on the current computer. You do not need to get through an installation process because you may double-click on the executable file in order to gain access to its interface. What's more, you can run it without administrative privileges. The tool does not leave entries in your Windows registry and create other configuration files so you may get rid of it using a quick deletion task. Simplistic design Java Audio Recorder reveals a clean and straightforward layout that comprises only a few configuration settings. Although you cannot appeal to a help manual, you can easily make the most out of the program's features because they look highly intuitive. Recording capabilities The application offers you the possibility to record audio streams to WAV, AU, or AIFF file format. You may set the preferred file format directly from the main window. Other important options worth being mentioned enable you to play back the recorded audio streams and delete the recorded files. By default, the recorded items are stored in the same folder where the utility is saved. You cannot select the saving directory. Tests have pointed out that Java Audio Recorder executes recording tasks quickly. It does not eat up a lot of CPU and memory resources so the overall performance of the system is not affected. Final observations To sum things up, Java Audio Recorder comes packed with basic features for helping you record and save audio streams to different file formats, and is suitable especially for less experienced users. ]> Tune Audio Suite 3.4.3.0 04 Nov 2015 19:04:33 +0000http
