Along with the development of the Internet, many online products are presented to us. Web Services (also called Web services) as one of the Internet interconnection technologies provide a method of technology by which web browsers communicate with application clients. A web browser sends a request to a web server, and the web server sends back the necessary response to the client through the web browser. The online services are based on HTTP (Hyper Text Transfer Protocol), and work in the following manner: (1) The client sends the request to the web server, that is, the browser sends a request to a web server through the Internet and when the web server is online, the web browser sends the request to the web server; (2) The web server generates the necessary response to the client through the web browser
